

Ibiza, 28th April 2021

Dear Local2030 Islands Network Secretariat,

I am pleased to confirm that the Island of Ibiza supports the Four Principles of the Local2030 Islands Network:

- Identify local goals to advance the SDGs and strengthen long-term political leadership on climate resilience and net-zero emissions pathways.
- Strengthen public-private partnerships that support diverse stakeholders in integrating sustainability priorities into policy and planning.
- Measure SDG progress through tracking and reporting on locally and culturally informed indicators.
- Implement concrete initiatives that build island resilience and a circular economy through locally appropriate solutions, particularly at the water-energy-food nexus.

With this communication, we express our intent to implement these principles and we are committed to engaging in collaborative island projects which advance the local implementation of the Sustainable Development Goals. Ibiza will make a clear statement of this commitment to our partners and the general public.

Ibiza is committed to the island's sustainability, and knows that the local challenges of islands can be overcome working together at global level by collaborating with other islands, learning and exchanging together, with the final goal of preserving our identity, our values, increasing our sustainability and our resilience to improve the quality of life of our citizens.

Our top priorities of collaboration with the Local2030 Islands Network are:

1. Collective Development of Indicators for Islands and Monitoring instrument.
2. Financing of SDGs: How to attract investment and budgeting for SDGs.
3. Central Repository of initiatives and plans for knowledge exchange in advancing the SDGs.

Sincerely yours,

Vicente Roig Tur
Presidency and Environmental Management Councillor
Ibiza Island Council
